

PLASTIC FREE

«Plastic Free» is a voluntary organization that acts with the aim of raising awareness among people to help safeguard the environment.

PLASTIC FREE MUNICIPALITIES AWARD

Belpasso has been named a «Plastic Free» municipality in 2024, based on the actions implemented by the town to achieve the organization's objectives.

WHAT WE HAVE DONE

An objective of «Plastic Free» is to raise awareness in schools too. We attended one of their conferences in our school. They explained to us where to throw some waste that many threw into the undifferentiated. We also found that we are only 12 years to save our planet. We also contributed to protecting the environment by cleaning and removing waste from the school garden.
